

Tejas S. Jawalkar

Full Stack .Net Developer | C# | .NET Core | Angular | SQL Server | Layered Architecture

Hadapsar, Pune, 411028 | +91-9172804246 | tejassj1998@gmail.com | [LinkedIn](#) | [Profile](#)

PROFESSIONAL SUMMARY

Full Stack .Net Developer with 3+ years of experience developing enterprise web applications using C#, .NET Core, ASP.NET Core, Angular, and SQL Server. Experienced in backend development, REST API design, performance optimization, and full-stack delivery across healthcare and government domains. Strong understanding of OOP, SDLC, Agile practices, and building scalable, maintainable applications.

KEY ACHIEVEMENTS

- 90% query performance improvement | healthcare enterprise system
- 80% data processing reduction | govt. education platform (10K+ records)
- Led end-to-end delivery of 3 production modules independently

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL.

Frameworks: .NET Core, ASP.NET Web API & .NET MVC, Entity Framework Core (EF Core), LINQ, Dapper.

Frontend: Angular 15+, RxJS, Angular Material, HTML5, CSS3, Bootstrap.

Databases: SQL Server, Oracle12g, Stored Procedures, Query Optimization, Execution Plan Analysis.

Architecture & Concepts: Object-Oriented Programming, SOLID Principles, Layered Architecture, Dependency Injection, Repository Pattern, Façade Pattern, REST APIs.

Testing: xUnit, Moq (Basic), API Testing, Integration Testing.

DevOps & Tools: Git, GitHub Actions, CI/CD, IIS Deployment, Azure Key Vault, Swagger.

Practices: Agile, Scrum, SDLC.

PROFESSIONAL EXPERIENCE

Brainlines Solutions Pvt. Ltd. (Client: T-System ICT India) | Full Stack Developer

Jan 2025 – Present iMedOne Healthcare System

- Designed, developed, tested, and supported backend and full-stack modules for healthcare applications across enterprise workflows.
- Participated in code reviews and collaborated with cross-functional teams to ensure maintainable and production-ready releases.
- Worked with TypeScript/Angular-based UI enhancements and backend service integration.
- **Optimized complex SQL queries and stored procedures**, improving data retrieval performance and reducing execution time across critical healthcare workflows.
- Resolved production bugs and ensured high availability by analyzing logs, debugging distributed issues, and providing post-release support.
- Gathered and translated requirements from clinical stakeholders into feature specs, delivering 2 sprint-cycles of healthcare workflow modules on schedule with zero post-release critical defects.
- Refactored a monolithic healthcare module into a layered, facade-pattern architecture — reducing unit test time by 30% and enabling parallel feature development.
- Designed loosely coupled components using Dependency Injection, enabling easier Unit testing using xUnit with basic mocking concepts (Moq) and modular development.

Internal Engineering Initiative — Structured Logging Framework

- Conducted R&D and implemented a reusable structured logging framework using Serilog with custom SQL table columns.
- Enabled centralized logging, request traceability, and improved diagnostics across application modules.
- Configured structured logging, custom enrichment, request filtering, and SQL-based log persistence.
- Implemented configurable logging through application settings to simplify adoption and improve maintainability.

Splashgain Technology Solutions Pvt. Ltd. | Software Engineer (Full Stack Developer)

Aug 2022 – Jun 2024

ePravesh — MHT CET Agriculture Admission & Merit System

- Developed and enhanced REST APIs using .NET Core and built Angular-based UI modules with Angular Material, reducing page load times by 35% for high-volume government admission processing.
- Analyzed admission data across multiple databases using cross-DB SQL queries to generate statistical reports for regional student profiles.
- Collaborated with government clients for requirement gathering and solution design aligned with domain-specific compliance needs.
- Maintained source control and deployment activities using Git-based workflows and CI/CD practices.

ERP — Skill Development Center Management System

- **Reduced data processing time by 80%** by designing relational databases, writing optimized SQL queries, and implementing unit testing across attendance, result generation, and exam management modules.
- Built features for seat allocation, course creation, timetable management, and bulk admit-card generation — eliminating 100% of manual processing.
- Led client interactions, performance optimization, and migration activities; managed end-to-end delivery independently.

Photocopy & Revaluation System

- Assisted in creating RESTful APIs to support dynamic frontend requirements; conducted unit testing to ensure code reliability.
- **Linked two distinct databases within a single project environment** via API-driven data fetching, improving data integrity and reducing issue resolution time by 40%.
- Managed photocopy and revaluation process workflows, client reporting, and performance tuning across production deployments.

Splashgain Technology Solutions Pvt. Ltd. | Software Engineer Intern (Full-Time)

Jan 2022 – Jul 2022

- Contributed to REST API development and database design using .NET Core and SQL Server, applied SOLID principles and participated in code reviews and agile delivery cycles.
- Reduced issue resolution time by 40% through debugging, log analysis, and production troubleshooting.

PERSONAL PROJECTS (Self-Learning)

Clinic Management System | Desktop Application — C#, .NET (WinForms/WPF), SQL Server

- Designed and built an end-to-end clinical management desktop app covering patient records, appointments, billing, and reporting using C# and .NET (WinForms), with a relational SQL Server backend.
- Applied clean architecture, SOLID principles, and design patterns; implemented configurable database connection profiles for flexible environment management.
- Explored MVVM architecture by separating UI logic from business logic using ViewModel concepts, improving maintainability and enabling better testability.

Database Script Executor | Windows Desktop Application — C#, .NET, SQL Server

- Built a Windows desktop tool to execute SQL scripts across multiple database environments with script batching, execution tracking, logging, and error handling to ensure controlled and reliable execution.

EDUCATION

Master of Computer Applications (MCA) — Punyashlok Ahilyadevi Holkar Solapur University 2019 – 2022

Bachelor of Computer Applications (BCA) — Hirachand Nemchand College, Solapur 2016 – 2019

CERTIFICATIONS

- Building Modern Projects with React — LinkedIn Learning
- Git Essential Training — LinkedIn Learning
- Learning ASP.NET Core MVC — LinkedIn Learning

LANGUAGES

English (Professional) **Hindi** (Proficient) **Marathi** (Native)
