Tejas S. Jawalkar

Full Stack .Net Developer | C# | .NET Core | Angular | SQL Server | Layered Architecture | Agile & SAFe

70 Foot Road, Solapur, 413006 | +91-9172804246 | tejassj1998@gmail.com | LinkedIn | Profile

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 3+ years of experience developing and supporting enterprise web applications using C#, .NET Core, ASP.NET Core, Angular, and SQL Server. Experienced in backend development, REST API design, database optimization, application troubleshooting, and full-stack delivery across healthcare and government domains. Strong understanding of OOP, SOLID principles, layered architecture, dependency injection, unit testing, and Agile/SAFe methodologies, with a focus on building scalable and maintainable applications.

KEY ACHIEVEMENTS

- Improved SQL query performance by 90% and developed reusable calculation functions for the healthcare module.
- 80% reduction in data processing time | Education platform processing 10K+ records.
- Independent delivery of 3 production modules | Managed end-to-end development and delivery.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, PL/SQL.

Frameworks: .NET Core, ASP.NET Web API, ASP.NET MVC, Entity Framework Core (EF Core), LINQ, Dapper.

Frontend: Angular, RxJS, Angular Material, HTML5, CSS3, Bootstrap.

Databases: Microsoft SQL Server, Oracle12c, Stored Procedures, Query Optimization, Execution Plan Analysis.

Architecture & Concepts: Object-Oriented Programming (OOP), SOLID Principles, Layered Architecture, Dependency Injection, Repository Pattern, Facade Pattern, REST APIs.

Testing: xUnit, Moq (Basic), API Testing, Integration Testing.

DevOps & Tools: Git, TeamCity, TFS, SonarQube, GitHub Copilot, CI/CD, IIS, Azure Key Vault, Swagger.

Practices: SDLC, Agile, SAFe Agile, Sprint Planning.

PROFESSIONAL EXPERIENCE

Brainlines Solutions Pvt. Ltd. (Client: T-Systems ICT India) | .Net Full Stack Developer

Jan 2025 – Present

iMedOne Healthcare System

- Developed, test, and support backend services and full-stack modules for enterprise healthcare workflows using .NET technologies and Angular.
- Work in a SAFe Agile environment, collaborating with cross-functional stakeholders to deliver healthcare application modules and enterprise features.
- Develop AI-assisted debugging prompts independently using GitHub Copilot Agent Mode to investigate complex defects, trace code execution, analyze potential root causes, and guide minimal, evidence-based fixes.
- Review code changes and collaborate with senior developers to maintain code quality, correctness, and production readiness.
- Enhance TypeScript/Angular interfaces and integrate frontend components with backend services and REST APIs.
- Optimize complex SQL queries and stored procedures to improve data retrieval performance across critical healthcare workflows.
- Troubleshoot production issues by analyzing application logs, debugging defects, and providing post-release support.
- Translate clinical stakeholder requirements into feature specifications and deliver healthcare workflow modules across two sprint cycles on schedule, with zero post-release critical defects.
- Refactor a monolithic healthcare module into a layered architecture using the Facade pattern, reducing unit testing time by 30% and enabling parallel feature development.
- Implement loosely coupled components using Dependency Injection, supporting unit testing with xUnit and basic mocking with Moq.

Internal Engineering Initiative — Structured Logging Framework

- Researched and implemented a reusable structured logging framework using Serilog with custom SQL table columns.
- Configured structured logging, custom enrichment, request filtering, and SQL-based log persistence to improve application diagnostics and request traceability.
- Implemented configuration-driven logging through application settings to simplify adoption and improve maintainability across application modules.

Splashgain Technology Solutions Pvt. Ltd. | **Software Engineer (Full Stack Developer)**
Aug 2022 – Jun 2024

ePravesh — MHT CET Agriculture Admission & Merit System

- Developed REST APIs using .NET Core and Angular UI modules using Angular Material, reducing page load times by 35% in high-volume government admission workflows.
- Analyzed admission data across multiple databases using cross-database SQL queries to generate statistical reports for regional student profiles.
- Collaborated with government clients on requirements gathering and solution design aligned with domain-specific needs.
- Managed source control and supported deployment activities using Git workflows and CI/CD practices.

ERP — Skill Development Center Management System

- Designed relational databases, optimized SQL queries, and implemented unit testing for attendance, result generation, and examination management modules.
- Developed seat allocation, course creation, timetable management, and bulk admit-card generation features, eliminating 100% of manual processing for the targeted workflows.
- Managed end-to-end module delivery, client interactions, performance optimization, and migration activities independently.
- Gathered business requirements, conducted user demonstrations, and provided on-call application support during critical admission periods to maintain application availability and resolve issues promptly.

Photocopy & Revaluation System

- Assisted in developing RESTful APIs to support frontend requirements and performed unit testing to improve code reliability.
- Integrated two distinct databases within a single project environment through API-driven data retrieval, improving data integrity and reducing issue resolution time by 40%.
- Managed photocopy and revaluation workflows, client reporting, and performance tuning across production deployments.

Splashgain Technology Solutions Pvt. Ltd. | **Software Engineer Intern (Full-Time)**
Jan 2022 – Jul 2022

- Developed REST APIs and designed SQL Server databases using .NET Core for real-world client projects.
- Applied SOLID principles, participated in code reviews, and handled client interactions, requirements clarification, debugging, and issue resolution within Agile delivery cycles.

EDUCATION

Master of Computer Applications (MCA) — Punyashlok Ahilyadevi Holkar Solapur University, Solapur. 2019 – 2022

Bachelor of Computer Applications (BCA) — Hirachand Nemchand College, Solapur 2016 – 2019

CERTIFICATIONS

- Building Modern Projects with React — LinkedIn Learning
- Git Essential Training — LinkedIn Learning
- Learning ASP.NET Core MVC — LinkedIn Learning
